EDUCATION

Georgia Institute of Technology (Georgia Tech), Atlanta, GA Aug 2020 – May 2025

- *Bachelor's and Master's in Aerospace Engineering - GPA: 3.87/4.00, 3.88/4.00*
- Relevant courses: Numerical Analysis, Combustion, Propulsion, Design Methods

St Clare's Oxford, United Kingdom Sep 2017 – May 2020

- *International Baccalaureate - GPA: 3.88/4.00 (converted)*

TECHNICAL SKILLS

- **Systems Management:** Server Administration, Database Management, Encryption & Security Protocols
- **Software Development:** C++, Python, Matlab, SQL, Node JS, React, Dash
- **Engineering:** SolidWorks, Ansys, Converge CFD, Cantera, GD&T, CNC Machinery
- **Languages:** English (fluent), Russian (fluent), Japanese (advanced)
- **Interpersonal:** Strong Leadership, Team and Result oriented, Effective Communication
- **Microsoft Office:** proficient in Excel, Word, OneNote, Outlook, PowerPoint, Teams

EXPERIENCE

Chief Technology Officer – CPM Supply And Services Inc. (Part Time) Jun 2025 – Current

- Architected a remote Linux server infrastructure to centralize network management
- Deployed enterprise CRM system with secure MongoDB backend, improving operational efficiency by 7%
- Delivered comprehensive IT services to 22 employees, troubleshooting hardware/software issues

CFD Automation Developer – Ben T. Zinn Combustion Laboratory Sep 2022 – May 2025

- Worked on NASA hybrid-electric engine hardware, utilized Computational Fluid Dynamics (CFD)
- Led an automation project to streamline design processes through Ansys Fluent and Converge
- Developed surrogate models using Scikit-Learn to accelerate iterative optimization
- Tested a Fuel Rich Relaxation Zone injection strategy, achieved a 0.7% reduction in NOx emissions

Teaching Assistant – Georgia Tech Jan 2023 – May 2023

- Developed and delivered lectures on Dynamics, bridged knowledge gaps to students in an accessible manner

LEADERSHIP

AIAA Aerospace Design Competition, 1st Place Aug 2023 – May 2024

- Managed 10 engineers for the “GenetriX” project at the AIAA Venus Exploration Competition
- Developed a Digital Twin to simulate and optimize the integration of all mission-critical subsystems
- Perfected the Entrance Descent Landing mechanism using Neural Network prediction

RoboTech Engineering Innovation Hackathon, 2nd Place Apr 2022

- Led a team of 3 engineers to design robotic buoy to clean out oceanic microplastic
- Won 2nd place overall, 1st place for SolidWorks design, and the ‘most creative project’ award
